First name: Nathan

Last name: Barton, CE, PE, DEE

Organization:

Title:

Comments: This project is an important one for both the local economy and State and national economy. The opposition is based on exaggerated fears and claims of environmental and economic damage, which the environmental assessment, as drafted, addresses adequately. A combination of federal and State regulation more than adequately provides protection for the environment. This project should be approved, to allow development of natural resources as intended for National Forest System lands.
