Comments: Once again the Forest Service is considering servicing a company that wants to ravage the forest, rather than protecting the forest itself. Exploration leads to drilling and I am against both in Spearfish Canyon or anywhere in the Black Hills. The Ponderosa project would rip up the forest displacing wildlife, make a racket of noise and bring truck traffic into and out of the forest 24/7 disturb the wildlife. The proposed project further disrespects the native tribes in that it borders tribally control land. I am against this project.
