Comments: The Black Hills are a beautiful place for people to come and explore and enjoy the outdoors with their families. There are so many beautiful sites to see that would be ruined by mining. It is an eye sore and not good for the environment. There is a diverse ecosystem in Spearfish Canyon that needs to be left alone. We can't take all the land and destroy it for selfish human reasons. Leave it alone, or there will be nothing left to make us happy after our crummy 9-5.
