Comments: Please do not allow e-bikes on non motorized trails in Deschutes NF. E-bikes are motorized and there should be no exception for them. Their speed (and weight) is incompatible with trail systems like Phil's, especially when piloted by an inexperienced or inattentive rider. Danger for all users, including runners and hikers, will be greatly increased by allowing e-bikes on non-motorized trail systems. Given the weight of e-bikes and their riders, the trails will deteriorate much more rapidly and degrade the experience for all users. These trails are non-motorized for a reason - let's keep them that way, please.
