Comments: Please don't allow this project to proceed. Brian Head Resort and the mountains are so beautiful and many of us need a place to go that isn't so commercial and populated. It's already changed so much since Brian Head opened in the 1960s. There is a delicate balance in nature that should not be overrun with commercial ventures and more population. Please let this beautiful place stay as it is - already with too much commercialism. We don't have enough water to support more people and the havoc they wreak on the natural environment. Fires have already ravaged this beautiful land. Please don't proceed. More is not always better. Less is more.
