Comments: To Whom it may concern,

I am writing my objection to the proposed "Class 1, Pedal-assist E-bikes on Select Trails #66475"

The use of a motorized pedal bike on mountain bike trails is not in line with the intended trail and classification of land use. This motorized vehicle displaces users with non motorized bikes. I have seen this first hand at trail systems across the west coast. As an avid mountain biker, having motor driven e bikes pass you during climbs at speeds up to 20 mph is very unsafe, intimidating and completely loses the nice feel of enjoying regular mountain biking.
