Title: Senior NEPA Reviewer

Comments: Hilary Henry, Hello! I am in the NEPA Branch at EPA Region 10 and reviewed the Cala-Wiley Scoping Packet. EPA supports efforts to improve forest conditions and structural diversity, and particularly appreciate the goal of accelerating attainment of the ACS objectives. I will not be submitting a formal comment letter, but wanted to reach out to introduce myself in case EPA can help with water quality, air quality, waste, or NEPA procedural related questions for this or future projects. Please note that there is an existing temperature TMDL for several waters in the project area. I recommend connecting with the state basin coordinator for specifics on the implementation progress and any actions related to these waters. The state leads implementation efforts under the state developed and issued Water Quality Management Plans (WQMP). According to their website, it looks like the contact for your basin (Willamette Mainstem, South Santiam Subbasin?) is Priscilla Woolverton (503-688-8801; [Priscilla.woolverton@deq.oregon.gov](mailto:Priscilla.woolverton@deq.oregon.gov)). Thank you! Caitlin Caitlin Roesler Senior NEPA Reviewer | NEPA Branch U.S. EPA Region 10 | Seattle, Washington
