Organization:

Title:

Comments: To whom it may concern I am a local minor to eastern Oregon. I travel throughout the region looking for gold prospecting minerals. On numerous occasions, I have had conversations with the US for service officials specifically Sean, McKinney of the Baker city, Oregon office and on several occasions I have had him ask for my acceptance Yet his information is deceptive to what is really being proposed on their end acceptance through deception is in my opinion fraud, and on numerous occasions, I was told there are no closed roads on the Whitman national forest, which is false there are closed roads and they plan to make a lot more. I believe when an official adapts fraud to their identity they need to be terminated.

This forest plan revisions needs to be abolished and we need to reopen the public lands for use.

Steven E. Butcher
