Comments: I live in and recreate in Twin Lakes, CO and have seen massive changes in the land since 2021. I support more guidance and designated campsites in Twin Lakes. I am only seeing the Interlaken area included on the plan and I think you guys are missing a huge area that causes many issues and trash. It's the dispersed camping that is surrounding Twin Lakes Forebay (across the street), behind the Forebay Dam, and near South Elbert Trailhead.

I have seen so much trash and bad behavior back there. I have seen people dumping their gray water on the ground from their trailers. Friends of Lake County can probably give you an estimate of how much trash and human waste was taken from that area (they did a cleanup last year and now annually).

Anyways, I think more guidance and restrictions on that area would be for the best. Designate specific campsites and limit how many people are able to be back there for free.
