Comments: I implore the U.S. Forest Service to select Alternative C (No New Leasing) as its proposed action on this project and, at a minimum, to not allow leasing in recreation areas, sensitive habitats, and areas occupied by species of conservation concern. This project is expected to provide zero permanent jobs for the local community so additional oil and gas leasing is not worth the risk to wildlife, recreation, and water resources. It is important that we protect public lands, especially in a state so lucky to have biodiverse and beautiful landscapes. The public deserves nature to stay natural so that we have rich, thriving environments that lead to happy and healthy people.
