Title:

Comments: the first priority is protectio and preservatoin and keep the mauling incompetent fores trangers and planners ouf of tihis. peter wohleben and suzanne stimard both are forest experts and know that you leave the trees alone. you leave the wildlife alone and dont have incompetent mankind maulingi them. mankind does not have the expertis of god and nature in helping a forest to stay health. and keep donald trumps rich pals from destroying it for logging and lumber and roads. no cattle ranching in this forest shoudl ever take place. no financial booty should be taken from this site owned by the public in full. you are simply managers it and you should give more importance to thecitizenry in what they want for this. not the local profiteers, their selfishness and greed will never stop. you need to listen to our please for safeguarding this land as natural from god and a benefit from god. mankind sucks when you place his expertise next to gods and natures.
