Last name: Brooks

Organization:

Title:

Comments: I opposed this project during the scoping phase. I am finding it unbelievable that the preferred alternative was selected, especially as this involves all kinds of mechanical equipment and helicopters. This completely violates the Wilderness Act and is not necessary. The structure is not needed. The remains of the structure could be hauled away by horses and backpacks. If the structure is rebuilt, it must be built using materials carried in by horses or people, and using hand tools.
