Title:

Comments: I am writing to express my concern over the lack of community input and comprehensive study of the proposed Custer Gallatin National Forest Cooke City Fuels and Forest Health Project. We may be a small community, but we are the caretakers of some of our countries most precious and wild lands. Without our input, you to not have the whole story or the entire picture.

I am adamantly opposed to this project starting without secure funding. Federal funding is more volatile than in my lifetime. Our forests and mountains could be at risk if any projects is not properly planned and executed.

I am opposed to this project due to the impact on the roads, the small town, the animals and what it will do to the recreation experience in the forest. Please consider my as one a vote of opposition.

Kay Cee
