Comments: Please consider a local resident parking and access plan before implementing more new restrictions. All working locals that would like to use these trailheads do not have the extra two hours of time added to the day that would be required by using the public transportation system that now exists. Many of us are trying to use quandary, McCullough, and Spruce Creek trailheads before or after work on their way to or from home. FS and county can still make their money by charging locals a yearly fee of \$100 for example. The restrictions that have been implemented at the quandary trailhead has cut down on usage because locals cannot comply with this system. It simply does not work for working locals to have to take a bus, especially if they have to leave their dog behind.

Implementing a yearly fee for locals seems like such an easy solution.

Thanks
