Comments: I am a Brian Head pass holder and also an active backcountry terrain user. Some aspects of Brian Head expansion sound positive. In particular, things that make better use of the terrain Brian Head already uses.

My main concerns with Brian Head expansion:

1. Changes to summer and winter access to existing trails.
2. Building lifts to places that aren't generally skiable, especially Brian Head summit.
3. Expanding excessive terrain that is not very suitable for resort skiing/riding - runs that are not very long or steep - and therefore don't add much to the quality of the resort.
4. Likely increases in lift ticket prices accompanying an increase in resort size.
5. Plans that push locals out in favor of outsiders.

Please address these issues as you consider this EIS.
