Comments: Thank you for addressing issues at trailheads. Please consider all the people that live and work in Summit County that use these trails daily in between working several jobs. Requiring expensive parking and bus fees is not inclusive to the model the county is trying to implement. Creating diversity and inclusion in the outdoors will not succeed if the backbone of our county can't afford to use our great outdoors. 2 hours out of your workday just to take public transportation to a trailhead simply does not work. The solution I offer is for working locals would be a yearly fee to park at trailheads, which can be attached to your license plate when renewing at the DMV, just as it is done for Colorado State parks. If they have figured this out, I'm sure the county can implement a similar scenario. It's a very simple solution...please consider the local working trail users.
