Comments: Outside of a few weeks a year, and we know exactly when those are, this plan is akin to utilizing a bazooka to kill a fly. You'll end up reducing access for those who utilize these areas the most due to inconvenience as has happened with our usage of Quandary. As a frequent visitor to these spots I don't think you have to do anything outside of for those high volume weeks though there's a sense from these articles that something major has be done. It feels like we have a boisterous minority driving this with the results being to the detriment to the vast majority of users who are mostly local. Please consider narrowing scope to toilet access and assess from there, I don't believe there's a need to spend all that money at once.
