i hereby object to entire ea presentec. there needs to br an eis. lost river needs full protection from logging. usda always l00% of the time says the logging plans have no impact but of course that is just plain fake govt like we had on the covid vaccine. same damn thing stille manating from corrupt washington dc. no change. still lying ftromm govt. of course this logging has a major impact on this site which belongs to the general public.l we cdont want any of it logged. we dont want road improvements nor road construction.taxpayers do not wanty our tax dollar sused inm any way for thsi damaging plan by usda.

usda is a maraduder of our public lands. a total marauder. the us public doeds not want the following in our public lands

1. no logging

2 no new roads or road construction

3. no prescribed fires

4. no chemical application at all. l00 years of chemical sprayng is killing the trees like beech, ash, oak, etc. and so many more. it is killing the soil. you have been spraying chemicals in our woods for l00 years now unsustabilably. you need to stop. thepison builds up for l00 years.

5. no grazing of any farm animals in this public site.

stop the desecration of our national lands that belong to the people. your management is atrociouis
