Comments: My family is from Cimarron County, Oklahoma, and we have frequented Red River/Taos/Questa since the late 1960s. We spend at least 1 week each summer and often several winter trips. The number of family members varies from 4- 24, depending on availability. I provide this context as we provide economic stimulus and a love for all things related to the enchanted circle. The proposed path would provide great value for those who seek predictable and safe outdoor adventures. This is particularly pronounced for the very young and those in their golden years. The project will serve to enhance the outdoor experience and appreciation for the wild and fantastic environment around Red River and Questa. I strongly advocate for the project and look forward to many years of use of this resource!
