Comments: As someone who actively rides horseback all over the great state of NM, I strongly recommend reconsidering allowing the use of e-bikes on any trail. My reasons for concern, e-bikes are rather quiet and fast, they make a bend and surprise horses from behind and can cause disastrous wrecks. While most horses are accustomed to such surprises there are some bikers that just don't follow rules and make situations even worse. They also are a cause for rutting and washing out of trails that already exist. Thank you for taking my concerns into consideration and thank you for thinking of us horseback riders!
