First name: Don
Last name: Wendell
Organization:
Title:
Comments: 1. The trail should be a minimum of 10' wide using crushed granite or a similar material.

2. Only Class 1 e-bikes should be allowed - no Class 2 e-bikes.

3. At least one access point should be provided - perhaps at the Columbine campground.

4. Sufficient funding should be allocated for on-going maintenance.

5. The areas that have annual mudslides should be addressed to minimize damage.

6. Education of trail users through signs, social media, and other means should be emphasized.

7. Enforcement of the trail rules is imperative to ensure a safe and enjoyable trail experience for all users.
