Comments: To Whom it May Concern,

I am writing in support of the proposal to construct new non-motorized trails in our rural community. Expanding trail access will enhance recreational opportunities and experiences, promote healthy lifestyles, and strengthen our connection to the natural environment.

Non-motorized trails support sustainable recreation and provide safe, accessible spaces for walking, biking, and other low-impact activities, and allow for greater public access to our public lands. They also offer economic benefits by attracting visitors and supporting local businesses.

I encourage the inclusion of measures to preserve critical wildlife habitats and corridors, protect other sensitive natural resources, and engage local stakeholders throughout the implementation process. This initiative is a smart investment in our community's well-being and future.
