Comments: This is an area that I spend many weekends per year recreating in. I hike and hunt in this area and I am very supportive of this project. The proposed treatment areas are long overdue for treatment. These areas have become so overgrown and decadent it is becoming detrimental to the wildlife.

I am particularly supportive of the prescribed burns proposed on the south facing hillsides. My only comment/suggestion would be to expand the prescribed burns into more of the areas that were burned in the early 2000's. Namely the Alpha/Beta and Clayton Creek Areas. The regeneration in these areas is far too thick and needs to be prescribed burned or thinned.

This is a great project, Full Support!

Thanks for the opportunity to Comment.
