This is not a valid way to conduct a survey of public support.

Its a charade and its obvious to anyone who wants to look at it in any detail.

And no- this for profit project that will benefit the few on public land should not occur. It is yet another example of absurd corruption occurring in our national forest. The whole vermont huts nonsense is violation both federal and state laws. Its a joke.

And so is the forest service for participating in this nonsense.

I really regret working for the NPS and doing public work for the public now that these agencies have gone full blown corporate.
