Comments: Please do not allow ebikes on this trail! The unfit and elderly are using ebikes to go places and distances they are physically unable to go. My friend and I had to help rescue an elderly man whose ebike's battery had died because he was physically unable to walk the 7 miles back to the trailhead. Also Ebikes are quiet and fast and frighten hikers and horseback riders. Ebike users are not only a menace to the safety of others, but also a safety menace to themselves!
