Title:

Comments: Love the vegetation management, but please keep the roads closed to motorized vehicles. The GWNF has too many open roads, with too many trucks and e-bikes, and is missing the opportunity to offer users a true wilderness experience which has to be earned via hiking and effort. There should be many more locations where it takes a 5+ mile hike to access. This preserves already low game populations and saves road maintenance money, lowers hunting pressure, while allowing the rewards of a true outdoor experience for the dedicated.
