Comments: We do not need more logging. We need more wilderness areas and we need the wilderness areas we have to be buffered by roadless areas.
I have hiked all 48 4000 footers in NH, some in summer, some in winter, and some in both. I have hiked 46 of the 52 With a View hikes, ditto as to seasons. I have hiked many other NH and VT trails not on these lists. I am 71 years old and look forward to passing this love of being out in quiet nature spaces on to my 2 young grandsons. But it is not only about me. It is about climate change mitigation, water quality, species protection, and the fact that we are only a small part of this wonderful planet. It is not ours to trash. Let's stop acting like it is, and instead of shrinking wild areas, work to grow them.
Thank you, K. Anne Lloyd
