Comments: I support this project and I think it will be a great asset to the community and visitors alike. With regards to the parking area at mile marker 1.7 (Bear Canyon), I would like to see the proposed 6 car lot increased if possible. The area already sees significant use. In addition, this area and the associated bridge should be include in phase 1 of the project. Lastly, I feel that rock climbing should be included as one of the increasing recreational trends in the region. Thanks.
