Comments: We are not in favor of a new trail from the new parking lot to the road to the lakes. We already have foot traffic and people leaving dog feces on the existing road. The roads have had marginal maintenance the last 2 years, and this year the road was impassable for a long period of time with many vehicles being damaged and suffering flat tires. I have helped numerous people out of the pot holes. I asked county employees, Forrest service people and utility people who is responsible for maintaining the roads. None of them admitted responsibility. Who is accountable for maintaining the road? They should be fired. I would like specifics on where the proposed trail will run and where it will connect to the existing road. There are existing houses, will the trail go above all the existing houses? Tying in the trail anywhere before the tunnel will have an adverse affect on the existing houses. In general, we are not supportive of this project. If the project proceeds, the county needs to budget for cleanup of the litter and pet feces near any houses on the trail.
