Comments: Please don't take the Heber horses away!  They have been there for so many years, they are now part of the land.  They bring in tourism dollars!  Breaking up a herd like this is cruel.  Horses know their families and this will kill some of them.  Some of them will end up in kill pens.  Some will end up in abusive situations.  If you want to control the population, there are ways to do so without collecting and removing the herd.
