Comments: Do not give away 'management' status to lost lake resort folks.
Figure this 'problem' out another way with tons, lots, many other stakeholders not just the FS and lost lake resort owners.
I highly encourage you since you seem to have the ability to to change land allocations to LSR for many thousands of more acres - just no land swaps or allocation swaps.We all need our forests to grow older, sequester that carbon and keep us alive with all they provide for us.

Redo this whole process with the folks who should have been involved from the start.
