Title:

Comments: I would like to thank all who have made this project possible and all who have put in long hours doing the scoping and paperwork process. I would like to give my support for the non-motorized trails included in this project, as I see the new non-motorized trails as a benefit for the community. I am however disappointed with the forest's decision to retract the motorized trails that were part of the original project as it was submitted by the Challis Community Trails Association. I feel that removing the option for motorized trails will only create more of a divide between the motorized and non-motorized community. Motorized users play a large role in the Challis community and deserve to have new trails as much as the non-motorized community. I strongly urge the Forest to consider their decision and add back at least some of the motorized trails that were originally proposed. So in conclusion while I do mostly support this project, I do not support the Forest's decision to not include the originally proposed motorized component.
