Comments: The images of majestic bighorn sheep standing on wild mountain ranges is an icon of Wild America. Please take the actions that are necessary to preserve the Bighorn Sheep of Washington State. So much of wildlife is under threat from human demand it is not sustainable for the wildlife. Domesticated sheep, goats and cattle have evolved to accommodate a variety of environments. The same cannot be said for our dwindling wildlife including the Bighorn sheep which need wide ranges and protection from communicable diseases for their survival.
