Comments: THE 2.5 miles of road MUST be constructed so the public can use them for decades as recreation and USFS can use them for Forest Management [fire fighting] purposes.

2.5 miles of road means that handicapped recreationalists will have more opportunity to explore NEW horizons and ALL recreationalists will have more elbow room.

Elbow room is what Makes Big Sky country feel LIKE Big Sky. There is a BIG SKY in New York City, BUT you can only see a small part with 10,000 other people looking over your shoulder.

As more people come to MT it is imperative THAT more opportunities are created for disbursement. You can only feel the Big Sky if you Cannot See the OTHER Guy!
