Last name: MARTIN

Organization:

Title:

Comments: As a avid Pilot and user of many airstrips in my travels I would like to offer the following support and points for the Blue Mountains Forest Plan.

Both commercial and private aviation activity has historically occurred on these Forests since the 1930s. Please consider adding "aviation" to the list of approved activities.

Aviation organizations have established Airstrip Integrated Operations and Maintenance Plans on the Wallowa-Whitman Forest. This plan can be replicated on each Blue Mountains Forest for airstrip maintenance. This is cost effective partnering with aviation groups to maintain the airstrips, saving USFS funds.

Airstrips are a component of the USFS nationwide transportation system, as are the roads and trails, and should be considered as such in any management plan

* Airstrips support Federal and State land management activities, wildfire operations, recreational and hunting use, emergency evacuation, access to private in-holdings and commercial ventures that support the local economy.

* Please add "Maintain Airstrips" to this list

Dispersed Usage

Airstrips provide locations for dispersed backcountry recreation.

Aesthetics

Airstrips appear as open meadows on level terrain, and offer habitat for wildlife.

Effect on Wildlife

Scientifically peer-reviewed studies show that aircraft noise has no detrimental effect on wildlife.
