Comments: Do not close any roads or cross country travel. If roads are not used they will close themselves.

Roads need to be there for fire suppression and access to forest fires ,camping, wood cutting.

I've lived here for almost 69 years . I've seen the forest get worse and worse as the years went by more fires less grazing less logging we need to change that.

This area is devoid of any family sustaining industry. We need the forest to be opened up for logging,grazing,firewood and recreation.

No more wilderness or roadless areas.

Logging and grazing cut down on the forest fuel load.

Randy James
