Comments: Hello. I'm writing to request aviation access be included in the Blue Mountain National Forest Land Management Plan. I use aviation to explore and visit our national forests and other public lands regularly.

The Blue Mountain National Forest has a history of aviation which should be preserved and help visitors access the area. Many organizations of which I am a member are willing and able to contribute time through a volunteer network to maintain airstrips in the Forest Area.

Aviation has been proven to be a great low impact way to allow access to wild areas. Please add airstrip maintenance and aviation access to the land management plan so that we may continue to access these beautiful lands and explore.
