Title:

Comments: Aviation is an important for both commercial and private activity for using and protecting our forest. i would encourage "aviation" to be on the list of approved activities. Partnering with the aviation groups all ready established would be able to maintain the airstrips for aviation, hikes, bicycles, water activities, hunting, emergency evacuation and wildfire operations are just a few to mention to keep the airstrips open. This would be a cost saving to USFS on the "Maintain Airstrips" to the list.
