First name: Sue

Last name: Craig

Organization: Oregon Unitarian Universalist Voices for Justice

Title: President

Comments: The area you are charged with to protect is a unique area where wildlife and especially water need to be protected. There is little enough space where roads and human interference are given limited access. The more roads and timber cutting allowed, the less protection occurs.

We, in Oregon already produce more soft wood production than anywhere else in the country. We also ship it to other countries for milling and use, rather than keeping it here for jobs and wood products.

Please protect these areas from roads, which produce more fire possibilities, and really protect our wildlife and the other activities that forests provide.

As a faith based organization, we ask that you protect our trees and wildlife that do not have a voice.
