Comments: I have worked with the Forest Service in CA to repair damage from free range cattle and what I have seen is not pretty or sustainable. Why should a few ranchers be allowed to degrade our forest while ranchers in other areas are excluded from this free lunch forest grazing.

Logging can and is being done in sustainable ways w/o creating new roads and clear cutting.

As droughts continue, water quality must be protected.

Finally I find it really offensive that there is a yellow highlighted message that blames Democrats for the government shutdown. Both Parties are to blame.
