Title:

Comments: I want stronger language that will guarantee that old growth trees/forests, wildlife and wilderness areas will be protected in the Blue Mountains and across municipalities. These natural areas need strong protection in order to stay wild - just as they have for millennia. We need to allow nature to do its own thing, as this is our best protection to buffer against a warming and unpredictable climate, industrial pollution and as a refuge from our modern lifestyle. Please keep these wild places wild and add strong language and enforcement practices to make would-be bad actors leave these lands alone.
