First name: margo

Last name: rettig

Organization:

Title:

Comments: I support a management plan that recognizes the ecosystem function, mandates ecosystem protection, water quality and allows a place for habitat, recreation including hunting, hiking, biking and boating. I support a plan that supports regenerative agriculture and grazing. I support a plan that keeps natural areas intact - it is healing to spend time outdoors among the majesty of public lands. My family travels to the wallowas twice yearly and eagerly supports the local recreation economy.
