Comments: Hello,

My husband and I traveled to Wallowa last Fall and loved the forest. The old growth Tamaracks are beautiful. The camping in the Wallowa State Park was inspiring and the lake pristine. So beautiful! What a special place!

We need forests that are left intact to help fight climate change which brings extreme weather and dangerous calamities to human communities. Our fellow creatures need the forest left intact for them to roam and thrive. Our spirits hunger for the clean air and fresh nature experience that the forest can give to us. We need to be humble in our approach to these magnificent lands.

Please fight the destruction of these precious lands that cannot be restored once they are gone. Please fight against the plan to use and abuse our Blue Mountain forests and the Wallowa area by the Forest Service.

Respectively submitted,

Marti Lindholm and Allan Smith
