Comments: Attention: Heber Wild Horse Territory Proposed EA

Thank you again for the opportunity to make comments on the proposed Heber Horse Territory EA.

Horses only belong in the designated Territory Boundary, not on the entire Forest. The Black Mesa and Lakeside Ranger Districts preformed EA's on Allotments under congressional direction. The Forest Service allocated forage for cattle and wildlife within these Allotments because horses were not designed to be there.

The Forest Service (Black Mesa District) is once again following congressional directives in conducting this Environmental Analysis for the Heber Horse Territory. This Territory has been designated for horses and therefore forage is being allocated for this use.

I agree with the proposed action for the Heber Horse Territory.

Thank you,

Quinn Smith
