Comments: Hello,

I only recently learned of this proposal and I want to state my objection to lowering Spirit Lake's water level. The work done by the Army Corps of Engineers has only created more problems instead of solving any! I suggest the following:

- 1) Gather more data and input from more groups.
- 2) Increase input from the public by extending the feedback deadline, especially because of the federal shutdown.
- 3) Consider other solutions, some that may not exist at this time.

Thank you.

Celeste Colasurdo
