Title:

Comments: Please stop Project #67838Our land and resources are not infinite. Don't rape our children's future. Every step taken becomes a mile of distruction. Don't give up! Let's wait for alternative ideas and creations that preserves nature's diversity. We need clean water and animals to take care of the land for us. We can't eat dirt if we loose the balance in our ecological systems.Please stop Project #67838 from going any further.Hold the line!Stay strong!Peace be with you,Kui
