Title:

Comments: The scope of this project is vague. Clearcutting or thinning is not acceptable, which is it? Clesrcutting is an archaiac practice. Projects should not be contributing to aridification and increased fire danger with little or no resilience, increased chance for sterilized soils and erosion.

The Yaak is where I go to get rejuvenated and spend time in nature, pick berries, camp & recreate.

Old growth needs to be protected, it is critical for forest health and for habitat for sensitive species. With the unique character of the area, the PNW trail, animal connectivity, diversity and ecosystem anchor, thorough planning and transparency is warranted.

There was no consultation with the adjacent property owners nor the Yaak Forest Council which is a lack of good faith. Be a good steward and neighbor. This project is not well planned and lacks transparency for what will be occur on the ground. I oppose.
