First name: Tracey

Last name: Slaughter

Organization:

Title:

Comments: There is simply not enough information about this proposal. More information and intentional collaboration is needed. I believe that the Yaak Valley Forest Council and adjoining landowners should be included in the planning and decision-making for this project. This would include an on-the-ground tour of the proposed project area with an open dialogue to encompass the full range of impacts from this proposal. That would also include how the slash will be managed, weed control and herbicide impact, invasive species concerns, native species composition, and soil compaction and erosion. The proposal must also address the impacts on the rare grizzly bear population that inhabits this forest. Please include the dedicated stewards and homeowners before proceeding with this proposal. The Kootenai is special, please handle with care!
