Title:

Comments: As a retired wildlife biologist who has worked for USFS, USFWS, and other federal and state agencies, I ask that the Forest Service concentrate their restoration project on forests most in need-even-aged plantations that were previously cut.

Please leave recovering natural forests alone.

A project of this scope and size-that threatens to degrade habitats for several listed threatened and endangered fish and wildlife-requires a full environmental impact statement under the National Environmental Policy Act (NEPA).
