Comments: Dear ONF,How can any responsible forest management entity call clearcutting these 2,000 acres"Reconstruction"? I beg you to leave the Dungeness and Morse Creek Drainages intact given theirinvaluable contribution to countering global climate change. The decision to harvest these legacyforests has been arrived at in an arbitrary and capricious manner without thought or application of legalprocess. To proceed as announced is an open invitation for the wasteful and fraudulent expenditure ofpublic funds, not to mention the centuries-long damage incurred by these ecosystems.Sincerely,James Wesley
